ABOUT US

SRD Machines (by Sharda Industries) is a leading supplier of versatile Special Purpose Machines (SPMs) for bearing components in Gujarat. Our machines are designed to deliver the most efficient solutions for mass production in the bearing industry. With over three decades of experience, we specialize in providing innovative solutions that boost production, enhance efficiency, and reduce cycle time, all while ensuring cost-effectiveness.

Our SPMs cater to automatic operations such as turning, parting, grinding, measuring, washing, and packing. These machines are engineered to minimize operation time, reduce tools and tackle changeover, and prevent production losses, making them ideal for optimizing mass production processes.

We provide effective and efficient solutions to address your challenges and bottlenecks with our expertly designed machines.

Our motto is simple: 'Bring us your problems, and walk away with the best possible solutions.'

Founder & CEO

Ashwin Patel

At SRD, we don't just compete with the best—we redefine what 'best' means.

HISTORY

1997

Sharda Industries' name was registered. We did bearing job work for well-known companies in a 600 sq. ft. rented space.

2000

We bought our own space and increased production capacity.

2005

We felt the machine cost was high and the delivered quality did not meet our expectations. So, we started forming a team for machine upgradation. Our Director, Viral & Nachiket, joined us during this time.

2007

We shifted to a larger industrial area of 7,000 sq. ft. and began upgrading our own machines.

2010

All machines were upgraded, and we entered the first stage of company automation. As we developed machines at reasonable costs with high accuracy, bearing industry leaders began approaching us for their machine upgradation.

2015 – 2020

Full-fledged production of machines began to meet the requirements of world leaders in the bearing industry. We started three segments:

- **Bearing Manufacturing**
- **Machine Manufacturing**
- **Turning Component Manufacturing**

2022

We shifted to a larger space of 40,000 sq. ft.

2025

We emerged as one of the industry leaders in the special-purpose machine manufacturing sector.

2021 – 2025

(Environmental Measures)

A 150 KW plant was established to meet our daily power requirements.

The 2030 carbon footprint goal set by GOI has been achieved.

Over 1,500 fruit trees have been planted and counting.

MISSION & VISION

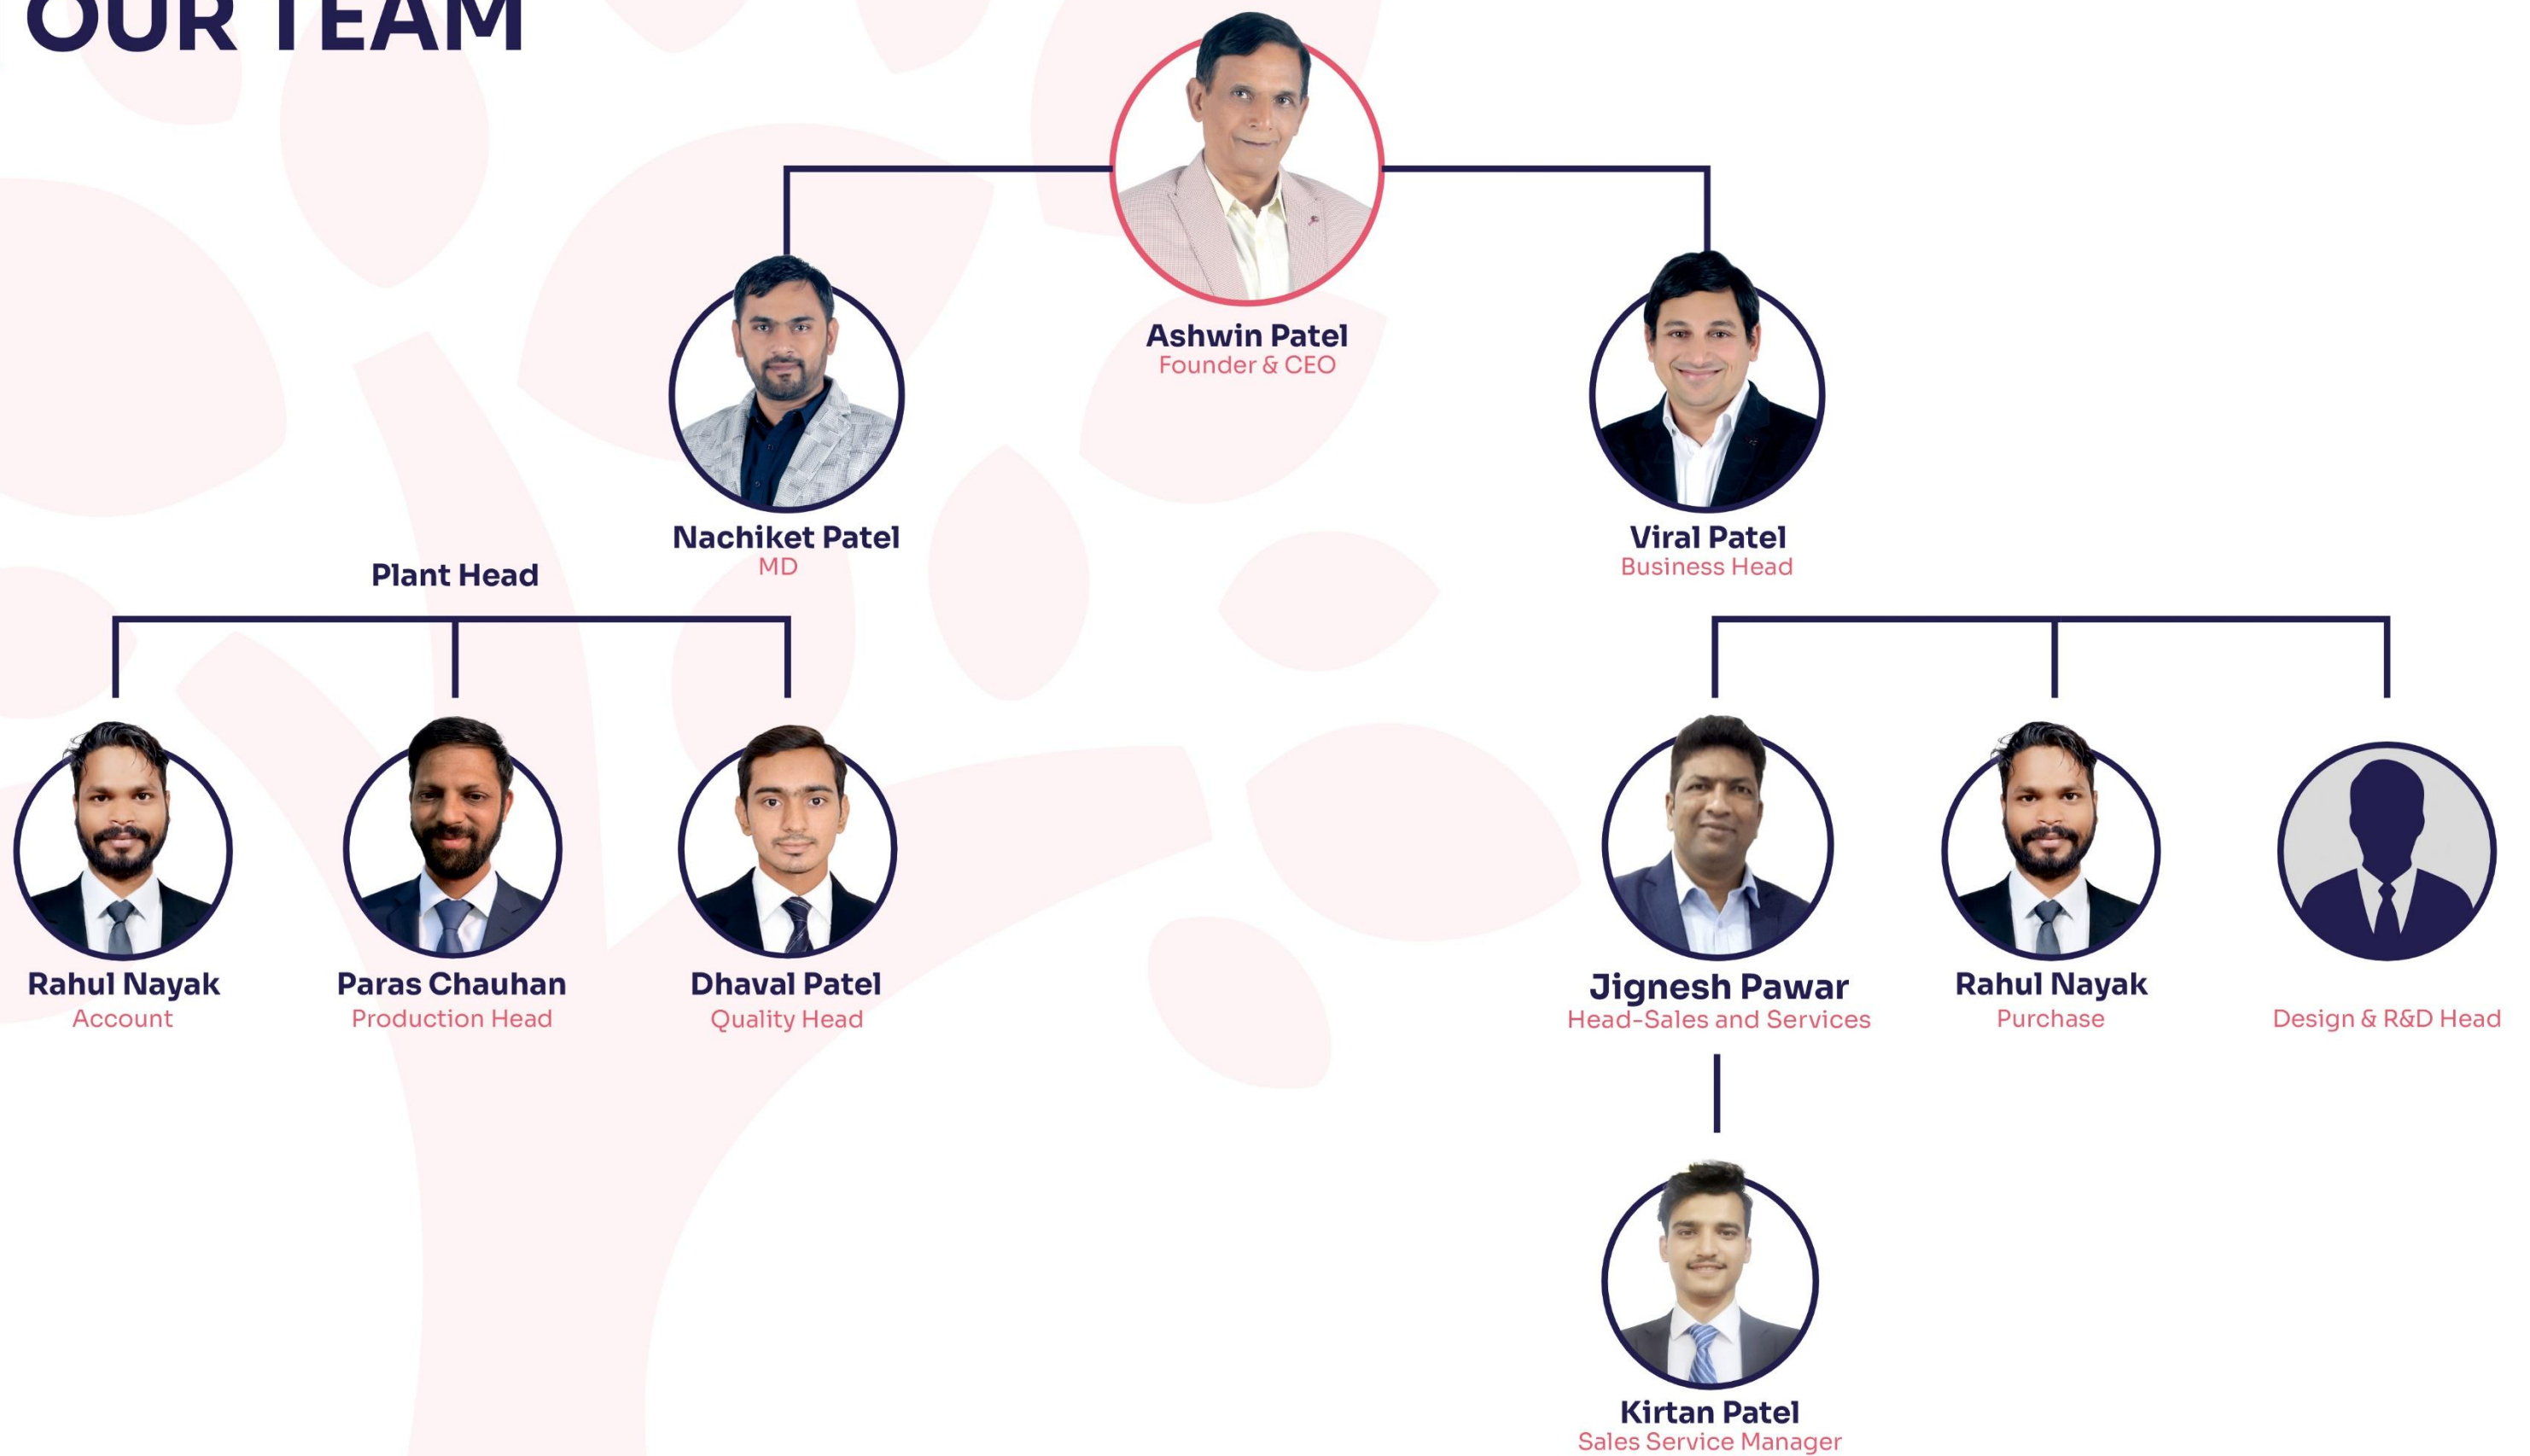

To be the global leader in Special Purpose Machines and high-performance bearing components, renowned for our dedication to innovation, quality, sustainability, and customer satisfaction.

Our mission is to provide industry-leading automation solutions and precision bearing components that help our clients achieve operational efficiency and superior product quality. We aim to remain at the forefront of technology, ensuring that our solutions cater to the evolving needs of industries worldwide while supporting a sustainable future.

OUR TEAM

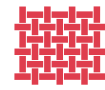

Grinding Machines

Segments we supply in:

Bearing Industry

Textile Industry

Pump Industry

Roller Industry

Automobile Industry

Types of Grinding Machines

Deep Groove Ball Bearing (DGBB)

Spherical Roller Grinding

Tapered Roller Bearing (TRB)

Special Type Grinding

Cylindrical Roller Bearing (CRB)

Bush Grinding & Milling SPM

Turning Machines (PLC / CNC)

Fully Automated / Semi-Automated

Segments we supply in:

Bearing Industry

Chain Bush Industry

Any Turning Industry

Special Purpose Machines (SPM)

Automobile Industry

Types of Turning Machines

Turning Line Multi-Station

Single Machine Multi-operation

Customization as per requirement

Parting Machines (PLC / CNC)

Fully Automated

Segments we supply in:

Bearing Industry

Automobile Industry

Pipe Industry

Pump Industry

Measuring Machines

(PLC Controlled)

(Fully Automated & Semi-Automated)

Segments we supply in:

Bearing Industry

Automobile Industry

Roller Industry

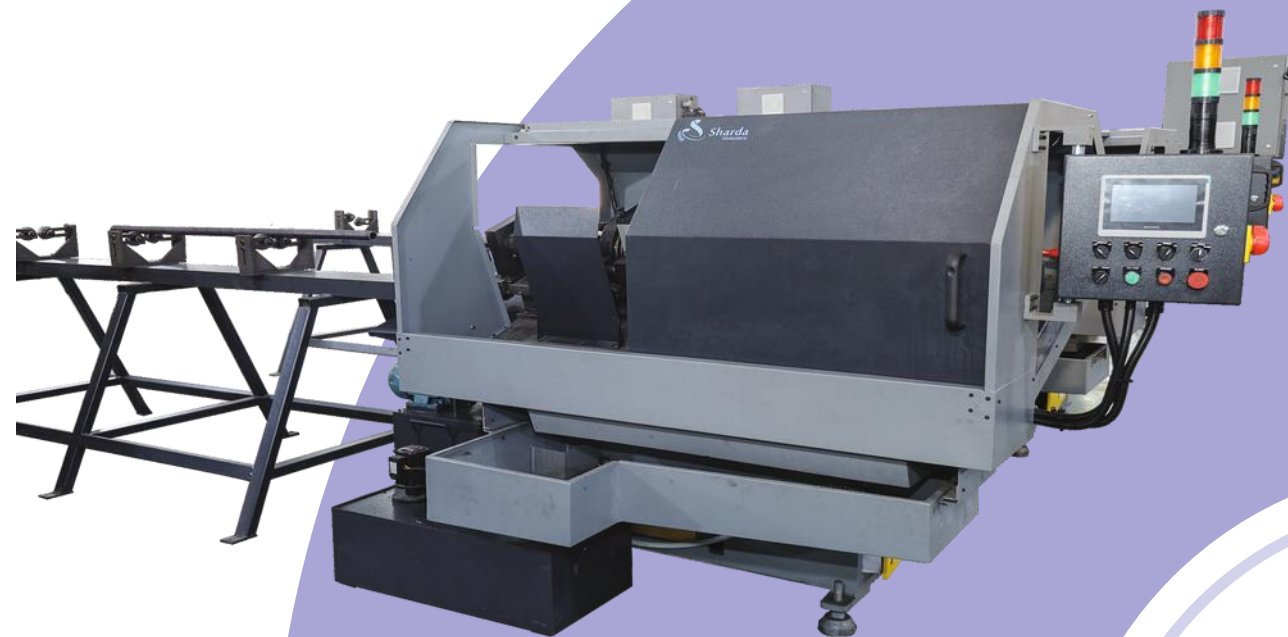

Special Purpose
Machines (SPM)

Type of Parting Machine

Pipe Parting Machine

Types of Measuring Machines

Dynamic Measuring

Static Measuring

Bore, OD, Face, Groove, and Track Measuring

Cylindrical Bearing Cage Lip Height Measuring

Roller Measuring (OD, Face)

Grouping Machine for Bearing Raceway, Roller, Shaft, Drill Length

Radial Clearance Checking for Bearings (RC Checking for Bearings)

Special Purpose Machines (SRM)

Pick & Place Systems

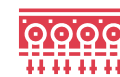

Conveyors

Non-Metallic Channels

Component Washing Machines

Dosing Pump Assembly

Multi-Station Milling Machines

Air Leak Testing Machine

Ball Filling Machine Ring

Feeder Rollers for feeding into Machine

Roller Feeding into Machine

Eddy Current Testing Machine (ECT) And Visual Checking Machine

- Eddy current testing uses the principle of electromagnetic induction to detect the flaws in the components.
- Multi-level Checking.
- Out Of value components/Reject components will automatically throw out in to respective rejection box.
- Dynamically ECT is done both side for O.D, Bore, & Face. Visual checking is also done dynamically for O.D. & Bore.

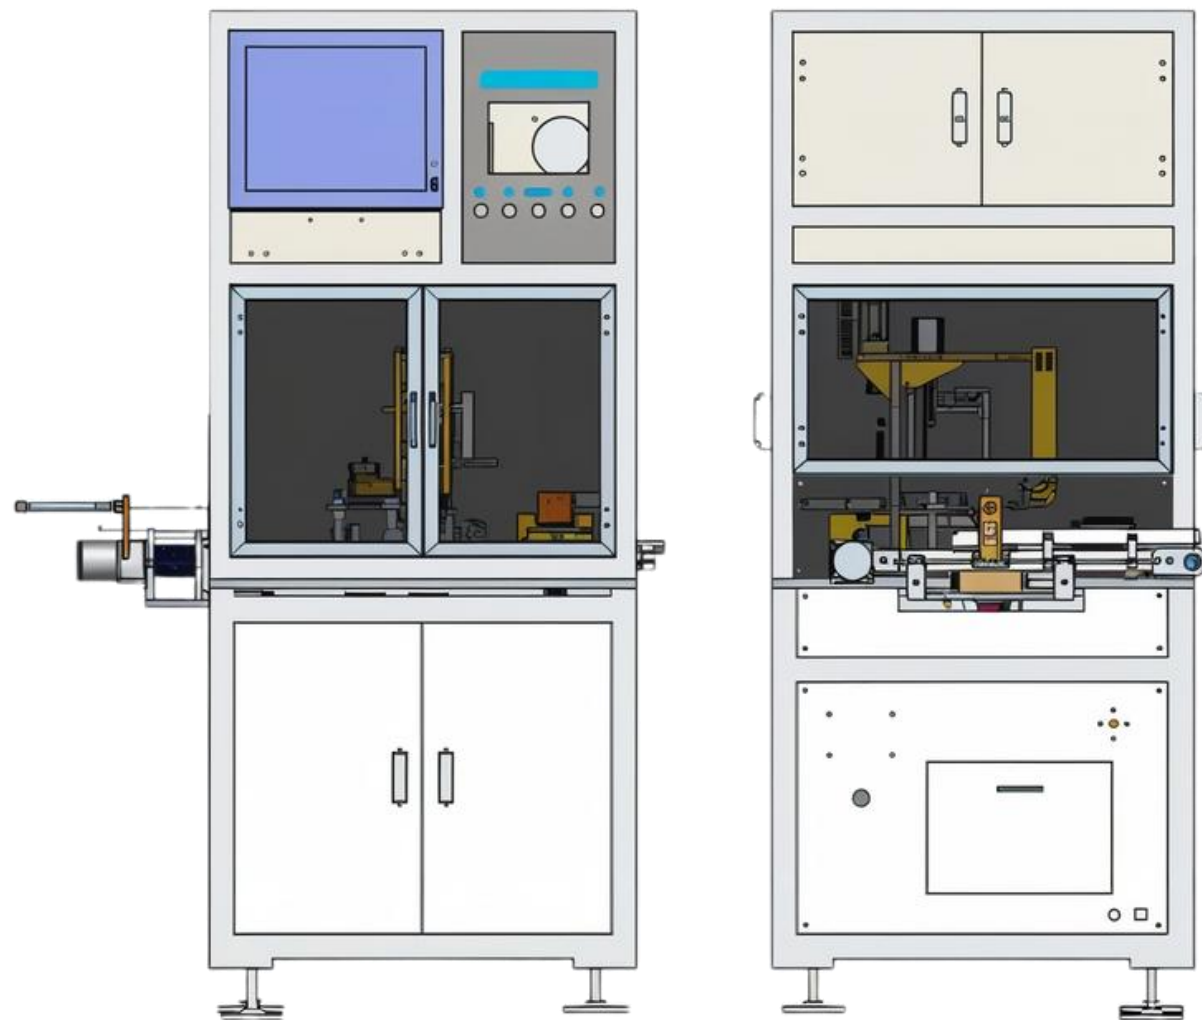

Specification:

Compact design.

Speed: Cycle time — Depends on component size and models 3 sec to 7 Sec.

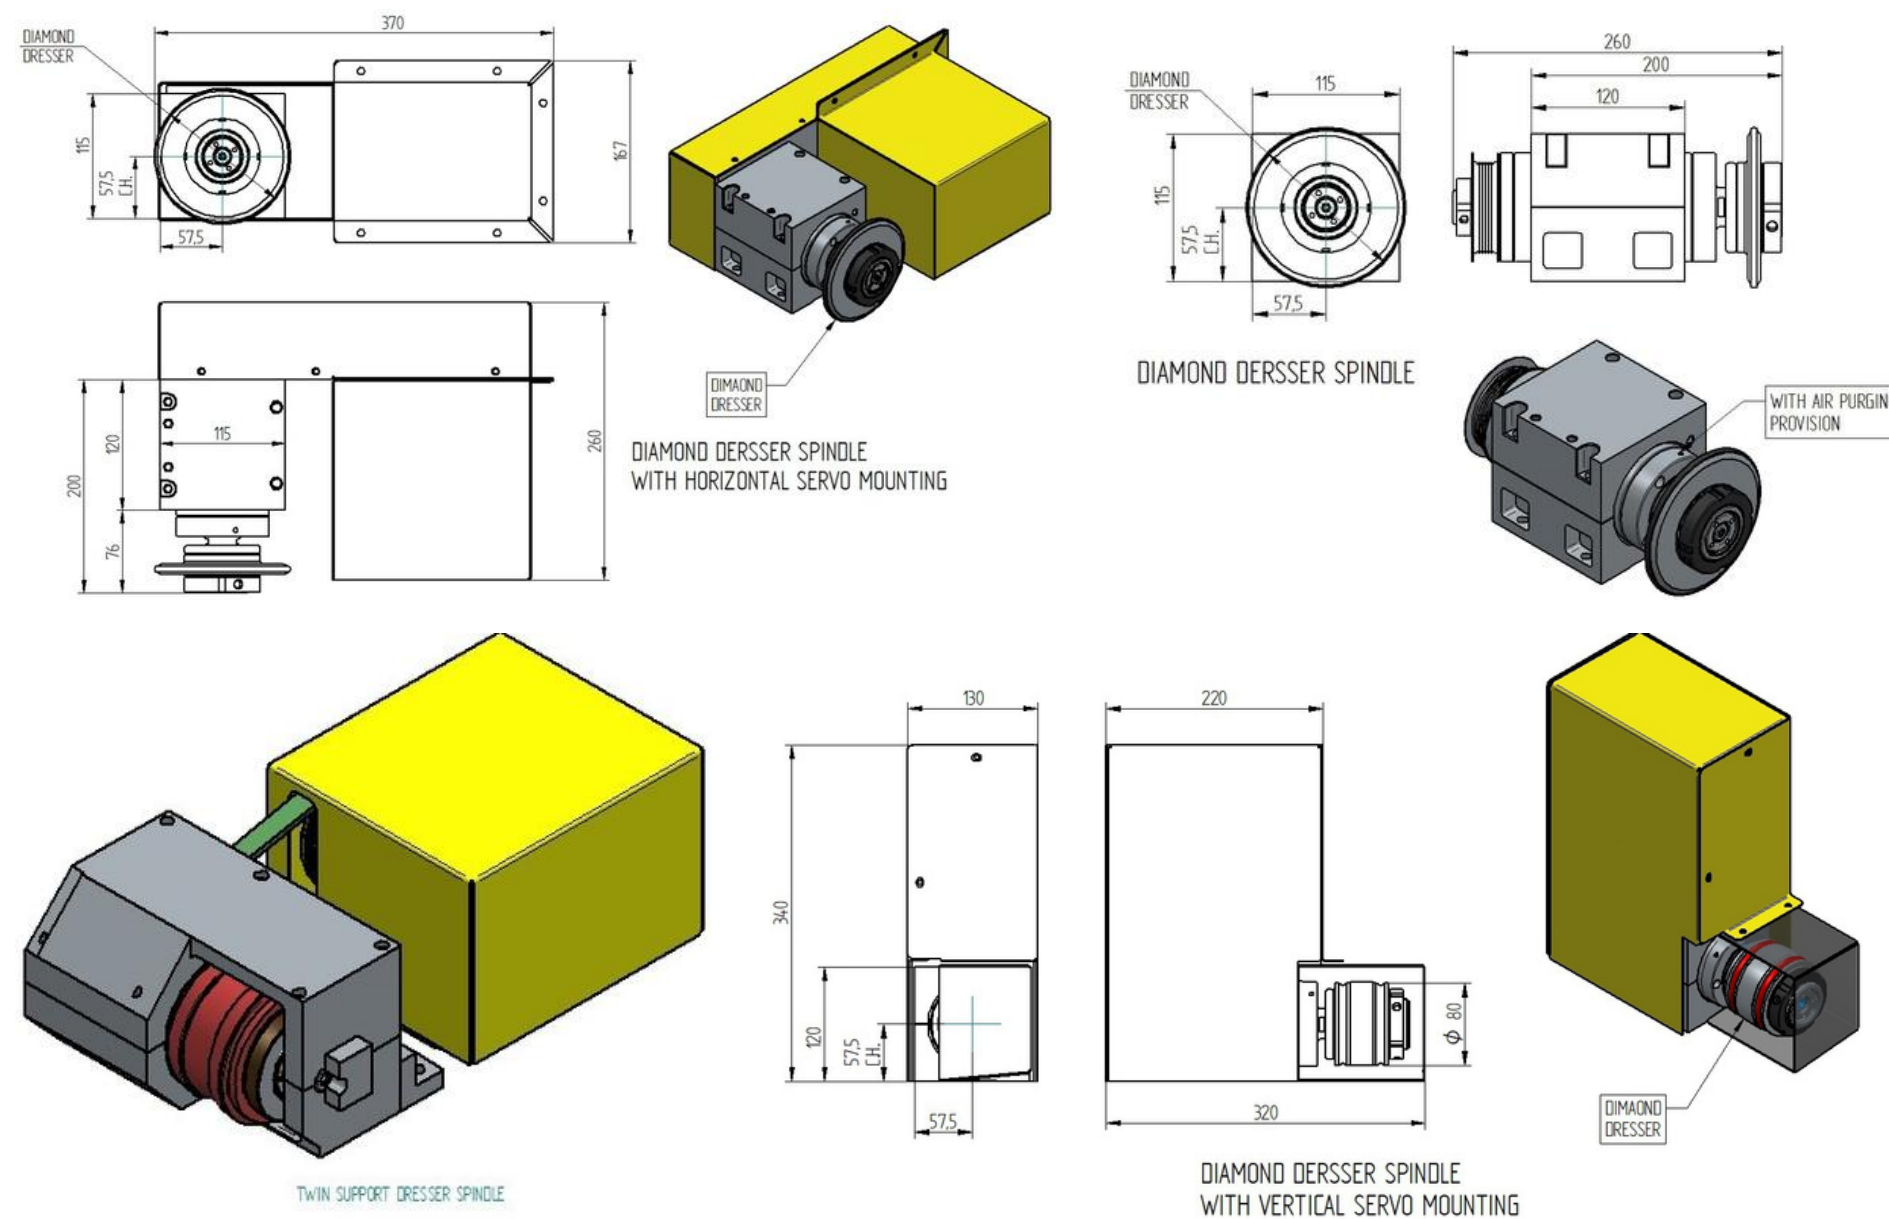

Calibration: Auto Calibration

We can provide the Spares and services. Also, Provide service for the required modification in future.

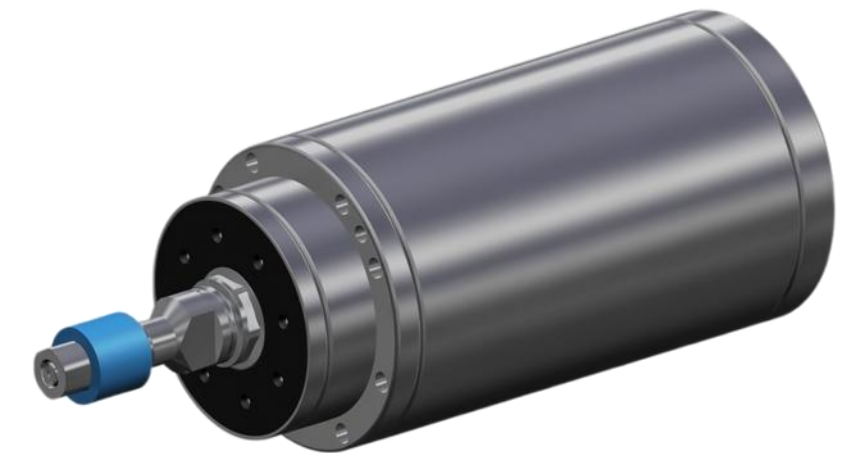

Spindles

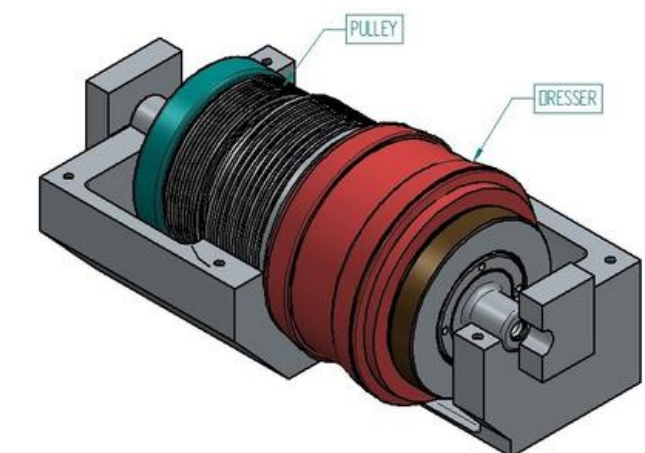

- High Frequency Grinding Spindles (Up To 100000 Rpm) (Marketing and Service Support)
- External Grinding Spindle S (Up To 3000 Rpm) Manufacturing and Service Support
- Dressing Spindle (Motorized , Servo) (Manufacturing and Service Support)
- Turning Spindle (Up To 6000 Rpm) (Manufacturing and Service Support)
- Twin Support Spindle for Dressing and Grinding (Manufacturing and Service Support)

Dressing Spindle

Grinding Spindle

TWIN SUPPORT DRESSER SPINDLE
